

Trussville City Hall Flood Renovations to City Hall, Police, and Fire Departments

Trussville, Alabama

After the flood of May 2003 which damaged the interior of several departments at City Hall, the City of Trussville contracted with Paradigm Architecture to design a new look for the City Hall, Police, and Fire Departments. It was a 10,700 square foot renovation on a tight schedule. Additional security was added at the City Hall with a glass wall separating the public from the offices. In the Police Department a new bullet-proof glass exchange window ensures the safety of the ticket clerk. Reorganization of the office work area made a more efficient use of space.

Owner: City of Trussville

Project Architect: Grant T. Gramstad, AIA

Completed: Spring 2003

Cost: DND

Size: 10,700 Square Feet

Delivery Type: Design-Build Negotiated

Contractor: Powers and Associates
